AJAY TANDALE

Chhatrapati Sambhaji Nagar, Maharashtra, India | +91 7755985578 | ajaytandale8983@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

B.Tech Computer Science student and entry-level Software Engineer with a strong Linux/Red Hat foundation (Red Hat Certified System Administrator) and hands-on automation experience using Bash and Ansible. Working knowledge of Python and SQL, with practical experience configuring, hardening, and troubleshooting RHEL-based systems and working with containerized environments (Docker, Podman). Comfortable with Git-based version control, TCP/IP networking fundamentals, and structured debugging. Seeking to apply software development, Linux systems, and automation skills to build and maintain reliable software and infrastructure as a Software Engineer Apprentice.

TECHNICAL SKILLS

Programming: Python, SQL (working knowledge), Data Structures & Algorithms fundamentals

Linux & Systems: Red Hat Enterprise Linux (RHEL 9.x), Linux Administration, SELinux, Firewalld, SSH, System Services, User/Permission Management

Containers & DevOps: Docker, Podman, Ansible, Git, OpenShift (hands-on lab exposure)

Networking: TCP/IP, Networking Fundamentals, HTTP/HTTPS basics, Wireshark

Software Engineering: Debugging, Troubleshooting, Automation, Scripting (Bash/Python), Problem Solving

CERTIFICATIONS & TRAINING

- Red Hat Certified System Administrator (RHCSA) — 2026
- Red Hat Certified Developer in Cloud-native Applications
- Networking and Web Technology — Infosys Springboard — 2025

PROJECTS

Linux Server Configuration & Automation (RHCSA Lab)

- Configured and hardened a RHEL 9.x server environment using custom Firewalld rules and SELinux policies to reduce attack surface and enforce least-privilege access.
- Implemented SSH key-based authentication and disabled unnecessary services to strengthen system security posture.
- Automated user creation, permission management, and auditing tasks using Bash scripts, reducing manual administration effort and improving consistency.

Virtual Mandi — Digital Marketplace Platform (Final Year Academic Project)

- Designed and developed a digital marketplace platform connecting farmers and buyers directly, removing intermediary steps in the sales process.
- Implemented core application features including product listing, pricing, and transaction flow logic.
- Applied requirements analysis, application design, and testing/debugging practices to improve platform usability and pricing transparency.

Wireless Networking & Security Lab (ESP32)

- Built a controlled lab prototype on embedded (ESP32) hardware to study Wi-Fi network behavior, including de-authentication and packet-injection scenarios.
- Analyzed wireless protocol behavior and network traffic to understand denial-of-service patterns and network vulnerabilities.
- Proposed mitigation approaches based on findings, applying networking fundamentals and structured troubleshooting.

EDUCATION

B.Tech in Computer Science — Maharashtra Institute of Technology, Chhatrapati Sambhaji Nagar | *Sept 2024 – July 2027 (Expected)*
Diploma in Computer Engineering — Marathwada Institute of Technology Engineering College, Satara | *Dec 2020 – July 2023*

ACHIEVEMENTS

- Secured 1st Rank in Technical Quiz during Diploma in Computer Engineering.
