AJAY TANDALE

Cloud Engineer | AWS | Terraform | Ansible | Linux

Chhatrapati Sambhaji Nagar, Maharashtra, India | +91 7755985578 | ajaytandale8983@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

B.Tech Computer Science student and entry-level Cloud Engineer with a strong Linux/Red Hat foundation (Red Hat Certified System Administrator) and hands-on Infrastructure as Code experience using Terraform and Ansible. Working knowledge of AWS fundamentals (S3, CloudFront, IAM, CloudWatch), with practical experience provisioning secure cloud infrastructure, hardening and automating RHEL-based systems, and working with containerized environments (Docker, Podman). Comfortable with Git/GitHub, TCP/IP networking fundamentals, and structured troubleshooting. Seeking to apply cloud, automation, and Linux skills to build and maintain secure, reliable infrastructure as a Cloud Engineer.

TECHNICAL SKILLS

Cloud (AWS): AWS Fundamentals, Amazon S3, Amazon CloudFront, Origin Access Control (OAC), AWS IAM (policies, least privilege), Amazon CloudWatch, S3 Encryption, S3 Versioning, HTTPS

Infrastructure as Code and Automation: Terraform (variables, outputs, modules), Ansible (playbooks, roles, Ansible Vault), YAML, Bash, Python

Linux and Systems: Red Hat Enterprise Linux (RHEL 9.x), Linux Administration, SELinux, firewalld, SSH, LVM, Filesystems, System Services, User and Permission Management

Containers and DevOps: Docker, Podman, Git, GitHub, GitHub Actions (CI/CD, exploratory), OpenShift (hands-on lab exposure)

Networking: TCP/IP, Networking Fundamentals, HTTP/HTTPS, Wireshark

Programming: Python, SQL (working knowledge).

CERTIFICATIONS AND TRAINING

- Red Hat Certified System Administrator (RHCSA) - 2026
- Red Hat Certified Developer in Cloud-native Applications (DO188) - 2026
- Networking and Web Technology - Infosys Springboard - 2025

PROJECTS

AWS Secure Static Website Hosting using Terraform

Technologies: AWS S3, CloudFront, IAM, Terraform, CloudWatch, Git, GitHub

- Designed and deployed secure static website hosting infrastructure using AWS S3 and Amazon CloudFront.
- Automated AWS resource provisioning using Terraform (Infrastructure as Code).
- Implemented IAM policies, S3 bucket encryption, versioning, and CloudFront Origin Access Control (OAC).
- Configured secure HTTPS content delivery and caching through CloudFront.
- Used Terraform variables, outputs, and modular configurations for infrastructure management.
- Implemented infrastructure monitoring and explored automated deployment using GitHub Actions.

Enterprise Linux Infrastructure Automation using Ansible

Technologies: Red Hat Enterprise Linux, Ansible, YAML, Podman, SSH, SELinux, LVM, firewalld

- Automated multi-server Linux administration using Ansible playbooks and reusable roles.
- Implemented automated user management, package installation, service configuration and SSH authentication.
- Automated Linux security hardening using SELinux, firewalld and SSH security configurations.
- Streamlined storage administration through LVM, filesystem management and persistent mounts.
- Automated Nginx and MariaDB deployment across managed Linux servers.
- Implemented secure secrets management using Ansible Vault and configuration validation.

Linux Server Configuration and Automation (RHCSA Lab)

- Configured and hardened a RHEL 9.3 server using custom firewalld rules and SELinux policies to reduce attack surface and enforce least-privilege access.
- Implemented SSH key-based authentication and disabled unnecessary services to strengthen system security posture.
- Automated user creation, permission management, and auditing tasks using Bash scripts, reducing manual administration effort.

EDUCATION

B.Tech in Computer Science | Maharashtra Institute of Technology, Chhatrapati Sambhaji Nagar | Sept 2024 - July 2027 (Expected)
Diploma in Computer Engineering | Marathwada Institute of Technology Engineering College, Satara | Dec 2020 - July 2023

ACHIEVEMENTS

- Secured 1st Rank in Technical Quiz during Diploma in Computer Engineering.
